

Why is having Accident insurance so important?

Accidents can happen at any time and when you least expect them. Today's active lifestyles may make you more susceptible, too.

Accidents can happen at any time: every 2 seconds at home ... every 6 seconds at work ... and every 9 seconds on the road.¹ You can't plan for accidents, but you can be better prepared financially to handle them when they happen. In the U.S. in 2011, there were more than 40,000,000 trips to the emergency room due to accidents.² At an average cost of \$1,354 per visit,³ it's easy to see why having accident coverage makes good financial sense. Just think about the likelihood of having an accident:

- Your child gets hurt playing sports or on the school playground
- You injure yourself while doing home repairs or while on vacation

Even the best medical plans may leave you with extra expenses to pay out of your own pocket.

As good as the health care is that you receive today, an accident can require a variety of treatments, tests, therapies and other care and services to assist in recovery. Each of these services usually means extra out-of-pocket costs for you to pay, beyond what your medical plan may cover, including:

- Medical plan deductibles
- Copayments for doctor visits and specialist care, as well as prescription drugs
- Extra costs for out-of-network care and treatment

Other household expenses may be harder to cover due to lost or reduced income, like your mortgage, car payment, child care or household upkeep while you recover.

Accident insurance can help you be better prepared by providing you with a payment to use as you see fit if you experience a covered event. There are no waiting periods for coverage to begin and payment will be in addition to any other insurance you may have. This payment can help you focus more on getting back on track and less on the extra expenses an accident may bring.

You can't plan for accidents, but you can be better prepared financially to handle them when they happen.
